

# Ideation Phase

Empathize & Discover

## Empathy Map Canvas:

An empathy map is used to understand the user's behaviours, attitudes, goals, and challenges. For this project, the empathy map focuses on the IT Procurement Team, which handles Standard Laptop requests and needs an efficient process for moving approved requests to the Hardware team.

### Customer / User:

IT Procurement Team member responsible for processing Standard Laptop requests.

Empathy Map – IT Procurement Team

### Empathy Map Summary

The IT Procurement Team needs a streamlined way to process approved Standard Laptop requests. The main pain points are manual task creation and assignment, while the desired gains are automatic Catalog Task creation, routing to Hardware, improved visibility, and reduced manual effort.

## Empathy Map Canvas

The following content can be used to populate the corresponding Mural Empathy Map visual. Add the project-specific sticky notes to the Think & Feel, Hear, See, Say & Do, Pain, and Gain areas.

### THINK & FEEL

- Wants the laptop procurement process to be simple and efficient.
- Wants approved requests to move to configuration without unnecessary manual work.
- Is concerned about delays or missed configuration tasks.

### HEAR

- Requests from employees for Standard Laptops.
- Approval information for submitted requests.
- Updates related to laptop configuration and task completion.

### SEE

- Standard Laptop requests in the Service Catalog.
- Requested Item and approval information in ServiceNow.
- Catalog Tasks that need to be assigned to the Hardware team.

### SAY & DO

- Processes Standard Laptop requests.
- Checks request and approval status.
- Coordinates configuration work with the Hardware team.
- Needs the configuration task to be created and assigned correctly.

### PAIN

- Manual creation of configuration tasks.
- Manual task assignment to the Hardware team.

- Possible delays or missed tasks after approval.
- Additional effort and inconsistent task handling.

#### GAIN

- Automatic Catalog Task creation after approval.
- Automatic assignment to the Hardware team.
- Better visibility and consistency.
- Reduced manual effort and faster processing.

#### Reference User Story

The IT Procurement Team wants a streamlined Standard Laptop ordering process so that configuration tasks are automatically generated and assigned to the Hardware team after approval, reducing user wait time and manual intervention.

Date | 03 October 2026
