UAT EXECUTION & REPORT

Date	03 October 2026
Team ID	SWUID-2026359158
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

1. Project Overview

Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Project Description	A ServiceNow solution that streamlines Standard Laptop procurement using Flow Designer. After a Standard Laptop request is approved, the flow creates a Catalog Task and assigns it to the Hardware team for configuration.
Project Version	1.0
Testing Period	03 October 2026
Application / Module	ServiceNow – Service Catalog, Requested Items, Approvals, Flow Designer and Catalog Tasks

2. Team Details

Team ID	SWTID-2026-5030
Team Leader	Tejesri R
Team Member	Shalini B
Team Member	Mozhiyarasi K

3. Testing Scope

- Standard Laptop Service Catalog request
- Requested Item approval
- Standard Laptop Flow Designer automation
- Create Catalog Task action
- Requested Item mapping to Catalog Task
- Assignment of the generated task to Hardware
- End-to-end procurement workflow

4. User Stories / Requirements to be Tested

- When a Standard Laptop request is approved, a Catalog Task should be created automatically.
- The generated Catalog Task should be assigned to the Hardware group for configuration.
- The Catalog Task should contain the relevant Requested Item information.
- The automation should reduce manual task creation and assignment.

5. UAT Test Cases

Test Case	Scenario	Test Steps	Expected Result	Actual Result	Status
TC-001	Standard Laptop request	1. Open Service Catalog. 2. Select Standard Laptop. 3. Submit request.	Requested Item is created.	Requested Item is created for the Standard Laptop request.	Pass
TC-002	Approval of request	1. Open Requested Item. 2. Review approval. 3. Approve request.	Approval is recorded as Approved.	Approval is shown as Approved.	Pass
TC-003	Flow Designer processing	1. Use approved request. 2. Verify Standard Laptop Task flow.	Configured flow processes the approved request.	Flow is configured with Create Catalog Task action.	Pass
TC-004	Catalog Task creation	1. Open Requested Item. 2. Check Catalog Tasks.	A Catalog Task is generated.	Catalog Task is generated for the request.	Pass

TC-005	Hardware assignment	1. Open generated task. 2. Check Assignment Group.	Task is assigned to Hardware.	Assignment Group is Hardware.	Pass
TC-006	Task details	1. Open generated task. 2. Verify description and request mapping.	Task contains configured request details.	Short description is "Laptop needs to Configured".	Pass
TC-007	End-to-end workflow	1. Submit request. 2. Approve request. 3. Verify task, assignment and state.	Approved request produces an actionable Hardware task.	Approval = Approved; Assignment Group = Hardware; State = Open.	Pass

6. Test Case Summary

Total Test Cases	7
Passed	7
Failed	0
Not Tested	0

7. Defect / Bug Tracking

No separate defect log was provided in the project implementation material. No individual defects are therefore added to this report.

Bug ID	Description	Severity	Status	Remarks
N/A	No documented defect	N/A	N/A	No defect record supplied

8. UAT Evidence

- Service Catalog – Standard Laptop request.
- Requested Item – approval status.
- Flow Designer – Standard Laptop Task flow with Create Catalog Task.
- Catalog Task – Assignment Group: Hardware.
- Final result – Approval: Approved; State: Open; Short Description: Laptop needs to Configured.

9. Acceptance / Sign-off

Role	Name	Signature / Date
Team Leader	Tejesri R	_____/ 03-10-2026
Team Member	Shalini B	_____/ 03-10-2026
Team Member	Mozhiyarasi K	_____/ 03-10-2026

10. Conclusion

The UAT confirms the documented Standard Laptop procurement workflow: an approved request leads to automatic Catalog Task creation and assignment to the Hardware team. The documented result supports the intended automation and reduces the need for manual task creation and assignment.
